SKILLS

Machine Learning & AI

- Machine Learning
- Deep Learning
- NLP
- LLMs
- Agentic AI
- RAG
- Multi-Agent System
- Prompt Engineering
- Generative AI

Programming

- Python
- Rust
- SQL

Frameworks & Libraries

- PyTorch
- TensorFlow
- Hugging Face Transformers
- Pandas
- Numpy
- Scikit-Learn
- Matplotlib

Tools & Platforms

- LangChain
- LlamaIndex
- MCP
- PGVector (Vector Store)
- AutoAgents
- Rig
- Ollama
- Flask
- GPU Computing
- Data Engineering
- Database Management

PROFILE

Aspiring Machine Learning and Agentic AI professional specializing in domain-specific LLMs, RAG pipelines, and autonomous AI agents. Passionate about solving real-world problems through hands-on learning and experimentation. Highly organized, self-motivated, and eager to grow in the field of artificial intelligence.

WORK EXPERIENCE

Makclave Solutions — 2023 – Present

Machine Learning Engineer

- Developed a Domain-specific LLM Agent system for user queries, that operates solely on curated documents and databases using RAG pipelines, without relying on general Pretrained knowledge.
- Implemented MCP server and client to enable Agent coordination and communication in domain-specific LLM workflows.
- Implemented incremental learning pipeline for a llm that dynamically retrieves and updates knowledge from new documents.
- Developed a token price prediction model incorporating user preferences and market trends to improve forecasting accuracy.
- Developed an MCP-based multi-agent architecture with prebuilt domain-specific agents and RAG pipelines. Agents combine database retrieval with tool execution capabilities such as automated email dispatch.

EDUCATION

BSc in Statistics — 2015 – 2017

University of Karachi.

FSc in Pre-Engineering — 2012 – 2014

Board of Intermediate Education, Karachi.

SSC in Science — 2010 – 2012

Board of Secondary Education, Karachi.

LANGUAGE

- English
- Urdu
